

# Taurus® G3 T.O.R.O.

Taurus Optic Ready Option

## OVERVIEW

The G3 continues the proven polymer-frame profile now in a full-frame configuration, with generous stippling patches across the grip for maximum control and retention in any shooting condition, an ergonomic palm swell and side-frame Memory Pads that provide quick, positive hand positioning. The frame has an integrated Picatinny rail. A manual safety and slide release lever are optimally positioned above the thumb for easy manipulation. A refined element of the G3 is the 6-lb. trigger, designed with a smooth take-up and a surprisingly crisp, clean break exceeding that of typical striker-fired pistol trigger performance. A short reset promotes quick, controlled follow-up shots.

The Taurus G3 T.O.R.O. comes with a factory-installed slide cover. The firearm also comes with 4 different adapter plates that allow you to mount a red dot sight on the slide.

## KEY FEATURES
